

Amendment of the Claims

Please cancel claims 1-18 without prejudice. Please withdraw claims 21, 23, 25, 30, and 32-34.

Claims 1-18. (Cancelled).

19. (Original) A method for conducting wireless transactions, comprising:
establishing wireless communication with a transaction counterpart; selecting a transaction;
reading biometric data of the user of said electronic wireless transaction apparatus;
validating said user's biometric data; and
transmitting a user identity validation upon successfully reading said user's biometric data.
20. (Original) The method described in claim 19, wherein said wireless communication is enabled with Bluetooth technology.
21. (Withdrawn) The method described in claim 19, wherein said wireless communication is enabled with infrared technology.
22. (Original) The method described in claim 19, wherein said transaction is a purchase.
23. (Withdrawn) The method described in claim 19, wherein said transaction is a secure validated identification of said user.
24. (Original) The method described in claim 19, wherein said user's biometric data is electronically stored in a user-wearable electronic wireless transaction apparatus.
25. (Withdrawn) The method described in claim 24, wherein said user's bio metric data is electronically stored in a secure apparatus located externally to said user-wearable electronic wireless transaction apparatus.

26. (Original) The method described in claim 24, wherein said wireless communication is disabled until said user's biometric data is validated.
27. (Original) A system for conducting electronic wireless transactions, comprising:
 - a user-wearable electronic wireless transaction apparatus;
 - a counterpart wireless transaction apparatus;
 - wireless communication between said electronic wireless transaction apparatus and said counterpart electronic wireless transaction apparatus; and,
 - a biometric data reading device communicatively coupled with said user-wearable electronic wireless transaction apparatus wherein said biometric data reading device is enabled to read a user's biometric data.
28. (Original) The system described in claim 27, wherein said user-wearable electronic wireless transaction device is enabled as a timepiece.
29. (Original) The system described in claim 27, wherein said wireless communication is enabled with Bluetooth technology.
30. (Withdrawn) The system described in claim 27, wherein said wireless communication is enabled with infrared technology.
31. (Original) The system described in claim 27, wherein said biometric data reading device is enabled as a fingerprint reading device.
32. (Withdrawn) The system described in claim 27, wherein said biometric data reading device is enabled to read said user's computer-identifiable voice characteristics.
33. (Withdrawn) The system described in claim 27, wherein said biometric data reading device is enabled to read said user's body thermal characteristics.
34. (Withdrawn) The system described in claim 27, wherein said biometric data reading device is enabled to read said user's body electrical characteristics.
